vinculum

equivalence

Don't forget the fractions vocabulary you already know!

I know that there are 10 tenths in 1 whole.

One whole

I know that tenths can be written as a fraction or a decimal.

$$\frac{1}{10} = 0.1$$

I know that tenths can be found by dividing 1 digit numbers by 10.

$$6 \div 10 = 0.6 \text{ or } 6 \text{ tenths}$$

I know how to order and compare tenths.

$$\frac{0}{10} \quad \frac{1}{10} \quad \frac{2}{10} \quad \frac{3}{10} \quad \frac{4}{10} \quad \frac{5}{10} \quad \frac{6}{10} \quad \frac{7}{10} \quad \frac{8}{10} \quad \frac{9}{10} \quad \frac{10}{10}$$

I know how to add and subtract fractions with the same denominator.

$$\frac{3}{10} + \frac{5}{10} = \frac{8}{10}$$

$$\frac{7}{10} - \frac{3}{10} = \frac{4}{10}$$
